PROJECTS

- SecureSign — Digital Document Signature App** | [GitHub](#)
- **Tech Stack:** Java, Spring Boot, React, MySQL, TiDB, JWT, PDFBox, Docker
 - Built a full-stack e-signature platform for secure PDF upload, signing, and document sharing workflows.
 - Implemented JWT authentication, MySQL-based document management, PDF signature stamping, and email workflows using Resend API.
 - Deployed the application using Docker, Render, and Vercel with TiDB as the cloud database.
- RAG-Based Document Question Answering System** | [GitHub](#)
- **Tech Stack:** LangChain, HuggingFace, ChromaDB, Groq LLM, Streamlit
 - Built a RAG pipeline for semantic question answering using document retrieval and LLM generation.
 - Implemented embeddings, chunking, metadata filtering, and vector search with ChromaDB for improved retrieval relevance.
 - Developed a Streamlit interface with Groq Llama 3 integration and source traceability.
